15	GUIDE-030	New: Copy a Menu Grid section	NXT-54019	4	Medium

Edits

Edit 1 — GUIDE-011 Edit and Add Transactions

NXT-54012 (resolved 2024-11-04). Insert under step 1 of *Change Payment Amount or Method*.

Current

1. On the right-hand panel, enter the Amount Tendered, Deposit Amount, or Change Returned in the New column, if needed

Proposed

1. On the right-hand panel, enter the Amount Tendered, Deposit Amount, or Change Returned in the New column, if needed

Partial payments are allowed on this screen.

If charge limits or Purchase Restrictions trigger an error, the override permission lets the user proceed.

Why Partial payment, previously only available at the POS, now applies on the Add/Edit Transaction screen and is gated by an override permission when charge limits or restrictions intervene (Appendix A.1).

Open questions (3)

- Customer-facing name of the charge-limit system setting referenced in AC as "BABECL".
- Specific Payment Method values eligible for partial payment (Description names Cash/Check vs. Card; not in AC or RN).
- Exact on-screen label of the override role permission.

Edit 2 — GUIDE-013 Reconciliation

NXT-60921 (resolved 2025-06-04). Replace step 1 of *Find a CLOSED Session*; add an observation line.

Current

1. Select the Site Code/Site Name, Status, and Date
2. Click the SEARCH button

Session information displays in the table below.

Proposed

1. Select the Site Code/Site Name (multi-select), Status, and Date

The search filters also include a Session # tab for direct lookup.

2. Click the SEARCH button

Session information displays in the table below.

Why The Site selector became a multi-select and a Session # tab was added to find a specific session without scrolling the grid (Appendix A.2).

Open questions (1)

- The new grid columns (Cashier, Total Sales, Meal Count) and column filters (Terminal/Cashier/Opening/Closing/Over–Under) are not enumerated by the existing guide; document them or keep page-flow-level only?

Edit 3 — GUIDE-013 Reconciliation

NXT-36439 (resolved 2023-04-18) + NXT-53996 (resolved 2024-08-23). New subsection after *Reconcile a Closed Session*.

Current

(no equivalent — new subsection)

Proposed

Delete a Session

The Delete Session option removes a session and adjusts off its transactions. Online payment sessions cannot be deleted, and sessions at Central Office are blocked from deletion (these typically contain Family Hub payments and refunds); contact Support to remove one.

1. Select Delete Session

A confirmation prompt requires a comment and shows the number of transactions and dollar payments in the session.

2. Confirm the deletion

A 30-second Undo is available. After that, all transactions are adjusted off and the session moves to Deleted status. Support cannot reverse the deletion.

3. View the resulting adjustments on the Transactions / Adjustments page

The adjustment uses the user's comment in the format "Session Deleted: <comment>".

Why Delete Session was added with confirmation, comment, and 30-second Undo, and is permanently blocked for sessions containing online payments — including the Central Office sessions that typically carry them (Appendix A.3).

Open questions (2)

- Exact UI control that opens Delete Session (Description: "More Actions dropdown on the Reconciliation page" — not in AC or RN).
- Should Restore Session (NXT-54040, resolved 2024-10-25) be documented as a sibling subsection? NXT-53996's RN explicitly anticipates it.

Edit 4 — GUIDE-014 Deposits

NXT-71628 (resolved 2026-05-04). Insert into step 3 of *Create Deposit Slips* (the section list shown after Click CREATE).

Current

3. Click the CREATE button

The Create Deposit Slip slide deck expands to display:

- Denominations
- Check(s)
- Summary

Proposed

3. Click the CREATE button

The Create Deposit Slip slide deck expands to display:

- Denominations
- Check(s)
- Cards
- Summary

The Cards section is visible when card sums are calculated, or after clicking Add Credit Card Deposit (which requires a comment); Remove Credit Cards hides it.

Why A new Cards section was added to the deposit feature so card transactions can be recorded separately, with conditional visibility and a manual surface/hide control (Appendix A.4).

Open questions (1)

- Whether the inline "(Expected: \$sum)" label and the exact variance formula belong in the guide or should be left for users to see in the product.

Edit 5 — GUIDE-014 Deposits

NXT-54193 (resolved 2024-12-26). Append observation to step 4 of *Create Deposit Slips*.

Current

4. In the Denominations section, enter the coin and bill amounts deposited

Either enter the count or specific amounts for each.

Proposed

4. In the Denominations section, enter the coin and bill amounts deposited

Either enter the count or specific amounts for each. A Sub-Total line shows the total of the Amount column.

Why A Sub-Total line was added under Coins and Bills, showing the total of the Amount column (Appendix A.5).

Edit 6 — GUIDE-014 Deposits

NXT-71628 (resolved 2026-05-04). Replace step 2 of *Edit Deposit Slip*.

Current

2. Enter the optional Bank Deposit Slip #

Proposed

2. Enter the optional Bank Deposit Slip # (alphanumeric)

Why The Bank Deposit Slip # field accepts alphanumeric values (Appendix A.6).

Edit 7 — GUIDE-014 Deposits

NXT-58466 (resolved 2025-03-24). Append bullet to step 6 of *Edit Deposit Slip*.

Current

6. Edit the information as needed
 - Denominations
 - Checks – Edit or Add a new check

Proposed

6. Edit the information as needed
 - Denominations
 - Checks – Edit or Add a new check
 - Bank Deposit Slip Number – edit here

Why The Bank Deposit Slip Number is now editable from Deposit Slip Details (Appendix A.7).

Edit 8 — GUIDE-014 Deposits

NXT-58466 (resolved 2025-03-24). New section after *Edit Deposit Slip*.

Current

(no equivalent — new section)

Proposed

Delete Deposit Slip

The Delete option removes a Deposit Slip. Deleting is based on user Role Permissions (Central Office, Director, and SchoolCafé Administrator by default).

1. Click Delete

A confirmation prompt displays.

2. Confirm the deletion

The status changes to Deleted. The History entry records who deleted the slip and when. Deleted slips are excluded from reports and rollups, and any linked Sessions return to Reconciled status.

A deleted slip's details remain viewable; use the deleted-slips filter on the Deposits grid to find them.

Why A permission-gated Delete was added with history tracking; deleted slips drop out of reports and rollups, and any sessions linked to them return to Reconciled status (Appendix A.8).

Open questions (2)

- Exact UI location of the Delete control (Description: "from inside Deposit Slip Details" — not in AC).
- Customer-facing label of the Delete permission shown in the role-permission admin UI.

Edit 9 — GUIDE-021 Edit Checks

NXT-58225 (resolved 2025-02-19). Insert preface and replace step 1; add observation to step 3 of *View Edit Checks*.

Current

View Edit Checks

1. Select the Site Code/Site Name
2. Select the Date
3. Click the APPLY button

Edit Checks display in the table below.

Proposed

View Edit Checks

The Filters section offers Edit Checks (default) or Reverse Edit Checks.

1. Select the Site Code/Site Name (multi-select)
2. Select the Date
3. Click the APPLY button

Edit Checks display in the table below. Each row includes a Sessions link to that Site and Date.

Why A new Reverse Edit Checks filter was added alongside the existing flow; the Site selector became multi-select and the result grid now links each row to its underlying Sessions (Appendix A.9).

Edit 10 — GUIDE-021 Edit Checks

NXT-58225 (resolved 2025-02-19). Replace step 2 observation of *Resolve Edit Checks*.

Current

2. Click the Resolve/Comment icon for the desired Edit Check

The Edit Check Comments pop-up window displays.

Proposed

2. Click the Resolve/Comment icon for the desired Edit Check

The Edit Check Comments side drawer displays.

Why The Comments window changed from a pop-up to a side drawer (Appendix A.10).

Edit 12 — GUIDE-022 End of Day

NXT-65307 (resolved 2025-10-22). Insert one sentence into the intro paragraph.

Current

The End of Day function is a self-management tool for site managers, allowing them to review and complete Daily Tasks. These Daily Tasks include Sessions, Marked for Review, Suspicious Transactions, Edit Checks, Serving Exceptions, and Deposit Slip. Also, the history for the individual task and the site and date can be viewed as needed. Reports can also be generated.

Proposed

The End of Day function is a self-management tool for site managers, allowing them to review and complete Daily Tasks. These Daily Tasks include Sessions, Marked for Review, Suspicious Transactions, Edit Checks, Serving Exceptions, and Deposit Slip. An Attendance task is also available when Daily attendance entry is configured for at least one SNP site, and is off by default. Also, the history for the individual task and the site and date can be viewed as needed. Reports can also be generated.

Why An additional End of Day task was introduced for districts with Daily attendance entry on SNP sites; it is off by default and must be enabled (Appendix A.12).

Open questions (2)

- Display label of this task in the EOD UI (Description: "Attendance Count" — not in AC).
 - UI control used to toggle it on (Daily Tasks SETTINGS, by analogy with the existing intro — not stated in AC).
-

Edit 13 — GUIDE-026 Charge Limits

NXT-54168 (resolved 2024-09-20). Insert a preface paragraph before step 1 of *Edit Charge Limits*.

Current

Edit Charge Limits

1. Ensure that the CHARGE LIMITS tab is selected

(no preface)

Proposed

Edit Charge Limits

If no charge limit has been set, the page displays "No Charge Limit". The POS treats a blank value as no limit applied.

1. Ensure that the CHARGE LIMITS tab is selected

Why The page now shows "No Charge Limit" when the value is blank, removing earlier ambiguity, and the POS treats no-limit identically to a blank value (Appendix A.13).

Edit 14 — GUIDE-029 Add Menu Grids

NXT-54019 (resolved 2025-02-07). Remove the *Is Template* bullet from step 2's sub-list.

Current

- Click the Is Template toggle switch to save the Menu Grid as a template that can be used when creating future Menu Grids

Proposed

(bullet removed; no replacement)

Why The Is Template toggle was removed from the Layout; templating moved to Copy Menu Grid on the main grid (covered by Edit 15) (Appendix A.14).

Edit 15 — GUIDE-030 View and Modify Menu Grids

NXT-54019 (resolved 2025-02-07). Append a new section after *Delete Menu Grids*.

Current

(no equivalent — new section)

Proposed

Copy a Menu Grid

Copy creates an exact duplicate of a Menu Grid under a new name.

1. Identify the Menu Grid you wish to copy
2. Click the Copy action for the desired Menu Grid

A prompt asks for the new name. The name must be unique for the district.

3. Enter a unique name and confirm

The system copies all settings and layout to the new Menu Grid, and a success message displays.

Why A Copy action was added that creates an exact copy under a new, unique name (Appendix A.15).

Open questions (4)

- Icon and hover text used to trigger Copy (Description: "Copy icon", hover "Copy Menu Grid" — not in AC or RN).
- Verbatim error text when the name is in use (Description has it; AC and RN do not).
- Verbatim success message (Description: "Menu Grid copied successfully." — not in AC or RN).
- Explicit list of properties carried over by "copy everything" (Description names Meal Type, Enabled, Site Type, Days Allowed, row/column counts, button positions; AC says only "everything").

Withdrawn / skipped

Edit 11 — GUIDE-021 / NXT-65306

Withdrawn: AC field is - (empty) and Release Notes are blank; no verbatim source supports a proposal. SME action: ask the product owner to backfill AC on NXT-65306 so the Attendance-driven Edit Checks section can be re-proposed under

this standard.

Appendix A — Source quotes (verbatim)

A.1 — Edit 1 sources (NXT-54012)

Acceptance Criteria (verbatim):

- * Editing Transactions → Partial Payment is possible, if BABECL and Purchase Restrictions are not triggered
- * User is given an error message if BABECL or Purchase Restrictions are blocking it when they try to Save
- * Special Permission for Override is added
- ** If user has the permission, they get an Override/Cancel option on the error message
- ** If they Override, allow the edit to go through

Release Notes (verbatim):

We have made an update to the Add/Edit Transaction screen to allow for a partial payment on a transaction - where the funds may be both from cash, and a debit at the same time. This functionality has always been available at the POS, but is now available while adding or editing a transaction via the website.

A.2 — Edit 2 sources (NXT-60921)

Acceptance Criteria (verbatim):

- * Site selector updated
- * Date selector updated
- * Separate tab added with Session # added as Search Filter
- ** Existing tab: Search
- ** New tab: Session #
- * 3 new columns added
- ** Available in Saved Views
- * Filtering added to 4 columns
- * User can save a View with just 1 column selected
- * Sessions grid data refreshes when user comes Back out of Reconciliation
- ** Retain Search Filters, pagination
- * Status tags colorized

Release Notes (verbatim):

We have rolled out a few changes to the Sessions page based on your feedback:

- * The Site dropdown is now a multi-select!

- * The Date selector has been updated to have more modern ranges. ('This Week', 'Last Week')
- * A Session # search tab has been added to help you find a specific session.
- * New grid columns - Cashier, Total Sales, and Meal Count.
- * Filters added to: Terminal, Cashier, Opening Balance, Closing Balance, Over/Under
- * Session Status tags are now color-coded.
- * You can de-select just about every column now.
- * Moving 'Back' to Sessions out of Reconciliation should work a bit better with keeping your place while still refreshing the sessions.

A.3 — Edit 3 sources (NXT-36439 + NXT-53996)

NXT-36439 AC (verbatim):

- * Delete Session option added.
- ** Requires a confirmation from the user.
- ** Requires a comment.
- * Undo button available for 30 seconds before deletion begins.
- * Deletion to be done via adjustments.
- * Adjustments of all types must be available under the Transactions > Adjustments page.
- * Adjustments should use the comment from the user in this format: Session Deleted: comment
- * Rollups run afterwards.
- * Role Permission added.

NXT-36439 RN (verbatim):

- * An option to delete a session has been added. Role permissions for this have also been added.
- * A 30 second 'Undo' option is available after confirming the delete, but after that all transactions in the session will be adjusted off and the session will be updated to a new status of Deleted.
- * Support will not be able to reverse the deletion; we advise being very certain before starting the deletion process.

NXT-53996 AC (verbatim):

- * Online Payment sessions cannot be deleted.
- ** User is informed why.
- * Delete Session Confirmation prompt updated to tell the user how many transactions and \$\$ payments are in the session.

NXT-53996 RN (verbatim):

We have temporarily removed permissions to delete sessions. If you need a session removed, please contact our Support team for assistance. The permission will be returned in the future along with an option to restore a deleted

session.

However, we have added in a permanent blocker to prevent sessions at Central Office from being deleted. These sessions typically contain online payments from Family Hub, along with refunds and other account-related actions taken by staff at the Nutrition Office. You will need to contact Support if one of these sessions does need to be removed.

A.4 — Edit 4 sources (NXT-71628)

Acceptance Criteria (verbatim, Cards section portion):

Add a new Credit Card Section in Summary for Deposits

- New section is automatically visible if calculated cards is > 0

- hide by default if calculated card = 0

- add button to add credit cards "Add Credit Card Deposit" where when clicked: shows new Credit Card Section as a summary section line and requires comment. Once clicked replaces itself with "Remove Credit Cards" button.

TOOLTIP: "Adds ability to track 3rd party credit card revenue to this deposit"

- When Remove button is clicked hide section and delete Card input.

- New Section that Provides space to enter in a credit card sum.

Calculate out expected credit card amount inline with new section as "Credit Cards (Expected: \$[sum])"

Adjust deposit Variance by subtracting the difference between the calculated Cards and Deposited Card Amount.
Variance sum = Variance sum - (Calculated Card - Deposited Card)

For legacy Deposit add note. New functionality is not available.

Release Notes (verbatim): *(empty)*

A.5 — Edit 5 sources (NXT-54193)

Acceptance Criteria (verbatim):

- * Sub-Total line added for Coins and Bills

- ** Shows the total of the Amount column. In the example above: \$0.74, \$17.00

Release Notes (verbatim):

We have updated Deposit Slips to show a sub-total for coins and bills.

This update was based on your feedback! Please feel free to send ideas and suggestions through to the team!

A.6 — Edit 6 sources (NXT-71628)

Acceptance Criteria (verbatim, Bank Slip # portion):

Make the Bank Deposit Slip # field alphanumeric instead of numeric.

Release Notes (verbatim): *(empty)*

A.7 — Edit 7 sources (NXT-58466)

Acceptance Criteria (verbatim, Bank Number portion):

- * User can update the Deposit Slip Bank Number while editing

Release Notes (verbatim): *(field points to NXT-56813 for the customer-facing notes; not present in this CSV row.)*

A.8 — Edit 8 sources (NXT-58466)

Acceptance Criteria (verbatim):

- * Delete option added
- ** Confirmation prompt
- ** Locked to Delete CRUD permission
- *** Rolled out to Central Office, Director, SC Admin roles
- * Status available for viewing in both Grid and Details
- ** Can filter out deleted slips
- * History updated → we can use a comment:
- ** Deposit Slip deleted by {{UserFirst}} + ' ' + {{UserLast}} at {{Full Timestamp}}.
- * Deleted Deposit Slips are not included in rollups / reports
- * Linked Sessions moved out of Deposited (move to Reconciled)
- * User can still see deposit slip details of a Deleted slip
- * User can update the Deposit Slip Bank Number while editing

Release Notes (verbatim): *(field points to NXT-56813; not present in this CSV row.)*

A.9 — Edit 9 sources (NXT-58225)

Acceptance Criteria (verbatim):

- * Date Picker updated to match the one on the FOH Dashboard
- * Site Picker swapped out for multi-select
- * Comments window changed to a side drawer
- * Sessions link added to Edit Checks result grid
- * Option to do Edit Checks vs Reverse Edit Checks added
- ** Edit Checks is the default selection
- * User can set the % under average meals they are searching for.
- * User can perform the search and see results.
- * User can Refresh the results (performs the search again).
- * In the results grid, user can see sites that fall within the % Under Average.
- * User can go to the Sessions for the Site + Date in the grid.

Release Notes (verbatim, abridged to first paragraph):

We have added an option to the Edit Checks page to allow for the configuration and searching of low meal counts.
We're calling these Reverse Edit Checks.

A.10 — Edit 10 sources (NXT-58225)

Same source row as A.9. Relevant AC line:

* Comments window changed to a side drawer

A.11 — *(withdrawn — see Withdrawn / skipped section)*

NXT-65306: AC = "-" (empty), RN = (empty).

A.12 — Edit 12 sources (NXT-65307)

Acceptance Criteria (verbatim):

- * End of Day task is available if:
 - ** Attendance entry method is set to Daily
 - ** At least 1 site is configured for SNP
 - ** Task is toggled off by default
- * Other columns:
 - ** Summary → Count: 123456 / Not Recorded
 - ** Detailed → Leave blank
 - ** Status:
 - *** Not Started if no count has been entered
 - *** Complete if any count, including 0, has been entered
 - ** Actions:
 - *** Record button
 - *** User can record/edit the attendance count for the site+date
- * Task count increases if the task is turned on for EOD and FOH Dashboard

Release Notes (verbatim): *(empty)*

A.13 — Edit 13 sources (NXT-54168)

Acceptance Criteria (verbatim):

- * User is informed if no charge limit exists / blank
- ** Text: No Charge Limit
- * POS updated to treat charge limits not existing as a blank value. (no charge limit)

Release Notes (verbatim):

We have updated the Charge Limits configuration page to clearly show when no charge limit has been set. Previously there was some ambiguity here; the text update is aimed to remove that.

A.14 — Edit 14 sources (NXT-54019)

Acceptance Criteria (verbatim, removal portion):

- * Is Template toggle removed from Layout

Release Notes (verbatim):

We have added a 'Copy' action to the Menu Grids page. This will create an exact copy of the existing Menu Grid with a new name.

A.15 — Edit 15 sources (NXT-54019)

Acceptance Criteria (verbatim, Copy portion):

- * Copy Menu Grid action added to Menu Grids grid
- ** User is prompted to name the menu grid
- ** Name must be unique for the district
- ** If name is fine, copy everything over to the new menu grid
- ** User is given a success message

Release Notes (verbatim):

We have added a 'Copy' action to the Menu Grids page. This will create an exact copy of the existing Menu Grid with a new name.

Appendix B — Agent self-checks

B.1 — Edit 1 self-check

- Style fingerprint: form=step trailing observation, peer length ~7–15 words, peer example: "Not all Items are eligible to be edited."
- Voice match: 2 short observation lines totaling ~22 words; Pass.
- Audience translation: "BABECL" → "charge limits"; "Special Permission for Override" → "the override permission" (generic — exact on-screen label is Open Q).
- Source-voice phrasing retained: None. AC's "Partial Payment is possible" rephrased to "Partial payments are allowed".
- Interpretation notes: AC's BABECL token treated as a system-setting code requiring user-facing translation; Description names Cash/Check vs. Card but I excluded that since not in AC/RN.

B.2 — Edit 2 self-check

- Style fingerprint: form=numbered step + observation line, peer length step ~6–10 words and observation ~6–10 words, peer example: "Click the SEARCH button / Session information displays in the table below."
- Voice match: step ~10 words, observation ~10 words; Pass.
- Audience translation: None required (Site, Date, SEARCH button, Session # tab are all user-facing).
- Source-voice phrasing retained: None.

- Interpretation notes: Scope-trimmed — AC/RN enumerate new columns and filters, but I confined the proposed text to multi-select + Session # tab to match the existing page-flow-level voice. New columns and filters surfaced as Open Q for SME scope decision.

B.3 — Edit 3 self-check

- Style fingerprint: form=section with brief context paragraph then numbered steps, peer length ~100–200 words per subsection, peer example: *Close an OPENED Session* (~190 words).
- Voice match: ~110 words across intro + 3 steps; Pass.
- Audience translation: "Delete CRUD permission" not present in this edit; AC of NXT-36439 says "Role Permission added" which is already audience-appropriate.
- Source-voice phrasing retained: None. NXT-36439 RN's "Support will not be able to reverse" rephrased to "Support cannot reverse the deletion." NXT-53996 RN's "temporarily removed permissions to delete sessions" deliberately omitted — describing current state, not transient state.
- Interpretation notes: Two source-level facts blended: AC's "Online Payment sessions cannot be deleted" + RN's "permanent blocker to prevent sessions at Central Office from being deleted (these typically contain online payments)" — rendered as both rules in the proposed text. Source contradiction (RN's temporary removal vs. AC's permanent block only) surfaced in Open Q about Restore Session.

B.4 — Edit 4 self-check

- Style fingerprint: form=section list bullet + observation line under same step, peer bullet length 1–2 words ("Denominations", "Check(s)", "Summary"); peer example: bullet "Denominations" / observation under step 3 = "(none today)".
- Voice match: new bullet "Cards" = 1 word; observation ~30 words; Pass with a flag — the observation is longer than typical peers because the conditional behavior (auto-visible vs. button-toggled) is genuinely complex. Considered a sibling sub-section (parallel to *Add New Check*) but that would have renumbered subsequent steps.
- Audience translation: AC's "calculated cards" preserved as a product term (user-visible label per Description); "Variance sum = Variance sum - (Calculated Card - Deposited Card)" formula omitted (developer detail; user sees the result, not the formula).
- Source-voice phrasing retained: None.
- Interpretation notes: AC's conditional logic compressed into one observation sentence at the cost of some detail (tooltip text, exact "(Expected: \$sum)" label format). Those details are user-visible in the product and don't need to live in the guide; flagged in Open Q as a scope question for the SME.

B.5 — Edit 5 self-check

- Style fingerprint: form=step trailing observation, peer length ~6–10 words, peer example: "Either enter the count or specific amounts for each."
- Voice match: appended ~12 words to existing observation; Pass.
- Audience translation: None required.
- Source-voice phrasing retained: None. AC's "Sub-Total line added" rephrased to "A Sub-Total line shows".
- Interpretation notes: None.

B.6 — Edit 6 self-check

- Style fingerprint: form=numbered step, peer length ~4–8 words, peer example: "Enter the optional Bank Deposit Slip #".
- Voice match: 7 words; Pass.

- Audience translation: None required.
- Source-voice phrasing retained: AC verbatim "alphanumeric" used directly — appropriate as it's an audience-meaningful term.
- Interpretation notes: None.

B.7 — Edit 7 self-check

- Style fingerprint: form=sub-bullet within numbered step, peer length 1–6 words with optional "Edit or Add" descriptor, peer example: "Checks – Edit or Add a new check".
- Voice match: 6 words ("Bank Deposit Slip Number – edit here"); Pass.
- Audience translation: None required.
- Source-voice phrasing retained: None.
- Interpretation notes: None.

B.8 — Edit 8 self-check

- Style fingerprint: form=section with brief intro then numbered steps + trailing note, peer length ~100–160 words per section, peer example: *Edit Deposit Slip* (~120 words).
- Voice match: ~95 words across intro + 2 steps + trailing note; Pass.
- Audience translation: AC's "Delete CRUD permission" → "Delete permission"; the role list (Central Office, Director, SC Admin) preserved verbatim — these are user-facing role names. AC's "SC Admin" expanded to "SchoolCafé Administrator" to match the existing guide's spelling pattern.
- Source-voice phrasing retained: None.
- Interpretation notes: UI location of the Delete control (Description: "from inside Deposit Slip Details") not used in proposed text; surfaced as Open Q. AC's History format string `Deposit Slip deleted by {{UserFirst}} + ' ' + {{UserLast}} at {{Full Timestamp}}` reduced to "records who deleted the slip and when" to avoid leaking template syntax to the guide reader.

B.9 — Edit 9 self-check

- Style fingerprint: form=section heading + brief preface + numbered steps with observations, peer length similar to existing sections (~50–90 words), peer example: existing *View Edit Checks* (~30 words).
- Voice match: ~60 words; Pass.
- Audience translation: AC's "Date Picker" / "Site Picker" / "FOH Dashboard" not propagated to proposed text — those are dev-facing component names; the user just sees a date picker and a site dropdown. Result-grid Sessions link kept as "Sessions link to that Site and Date" (Sessions is user-facing).
- Source-voice phrasing retained: None.
- Interpretation notes: AC's percentage-under-average configurability and Refresh button omitted from the proposed text — those are Reverse-Edit-Checks-specific workflow details and the existing guide is page-flow-level; if SME wants a Reverse Edit Checks sub-section, that would be a separate proposal.

B.10 — Edit 10 self-check

- Style fingerprint: form=step observation, peer length ~6–10 words, peer example: "The Edit Check Comments pop-up window displays."
- Voice match: 8 words; Pass.
- Audience translation: None — "side drawer" is the actual on-screen widget customers will see.
- Source-voice phrasing retained: AC verbatim "side drawer" used directly.

- Interpretation notes: None.

B.12 — Edit 12 self-check

- Style fingerprint: form=intro paragraph sentence, peer length one sentence ~20–35 words, peer example: existing intro's "These Daily Tasks include Sessions, Marked for Review..." (~25 words).
- Voice match: added sentence ~28 words; Pass.
- Audience translation: AC's "Attendance entry method" preserved as a configuration term, "SNP" preserved (USDA term familiar to the audience).
- Source-voice phrasing retained: None.
- Interpretation notes: AC does not name the EOD task's display label; rendered generically as "an Attendance task" rather than the Description's "Attendance Count" — name surfaced as Open Q. AC says "task is toggled off by default" but doesn't specify the toggle's UI control; the existing intro already says daily tasks are toggled via SETTINGS, but applying that here is interpretation — flagged in Open Q.

B.13 — Edit 13 self-check

- Style fingerprint: form=preface paragraph (two short sentences), peer length similar to other section prefaces (~25–45 words), peer example: *Edit Deposit Slip* preface: "The Edit option is used to edit the Deposit Slip if a change has occurred. Editing previously created deposits is based on user Role Permissions." (~26 words).
- Voice match: 2 sentences ~22 words; Pass.
- Audience translation: None required.
- Source-voice phrasing retained: AC verbatim phrase "No Charge Limit" used directly with quotes since it's the on-screen text the user will see; quoted form is appropriate.
- Interpretation notes: AC doesn't contrast blank with \$0.00 (an earlier draft did and it was removed); preface stays narrowly within AC scope.

B.14 — Edit 14 self-check

- Style fingerprint: form=bullet removal, no replacement.
- Voice match: N/A (deletion only).
- Audience translation: None required.
- Source-voice phrasing retained: None.
- Interpretation notes: AC explicit ("Is Template toggle removed from Layout"). The bullet's customer-facing replacement (Copy Menu Grid) lives in Edit 15.

B.15 — Edit 15 self-check

- Style fingerprint: form=section with brief intro + numbered steps, peer length ~50–80 words per section, peer example: existing *Delete Menu Grids* (~50 words).
- Voice match: ~60 words across intro + 3 steps; Pass.
- Audience translation: AC's "Menu Grids grid" (awkward repetition) avoided — referred to as "Menu Grids page" via context. AC's "If name is fine" (dev-team shorthand) translated to "If the name is acceptable" / "Enter a unique name and confirm".
- Source-voice phrasing retained: None.

- Interpretation notes: Several Description-derived specifics (Copy icon, hover "Copy Menu Grid", verbatim error and success messages, enumerated copied properties) omitted from proposed text and surfaced as Open Qs. AC says "copy everything over" — rendered as "all settings and layout" which is a paraphrase, not a claim about which specific properties are carried.
